DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Muenchinger (3,238,540). Muenchinger discloses a method of manufacturing a recess in the head of a fastener (fig. 1). Cross slotted recess portions (18) are formed with opposing walls (16,17). In column 7, lines 11-46 Muenchinger discloses that a tool is used to perform the method which has walls (48,49) which converge symmetrically and have inclined angles less than 3 degrees.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not disclose the method of claim 10, further comprising the formation of a square recess portion extending a second depth and having an overall square geometry wherein the second depth is less than the first depth, whereby the overall square geometry is within the overall cross slot geometry.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
